

Challenge Title

Photography

Description

Take a close-up photo that represents to you God's presence in the natural world (fruits, vegetables, flowers, plants, trees, animals, etc.).

Age Group

All ages

Have you ever looked at pictures of the stars, planets and galaxies and been amazed? As individuals, we can seem pretty minuscule and insignificant in the grand scheme of things. It can be very difficult to see what our roles are in the "big picture" of the universe. Do you sometimes feel an urge to find proof of the existence of God? One way to see and feel the existence of God is in the natural world around us. Examining the natural world – also in its details - helps us humans to see God. You can see God's beauty in trees, flowers, sunsets and landscapes. Our natural world, both the large and small of it, can touch us deeply. You can sense God's generosity towards us because He made us caretakers of his many gifts of creation.

1. Take a close-up photo (with a camera or cell phone) that represents to you God's presence in the natural world (fruits, vegetables, flowers, plants, trees, animals, etc.).
2. Send one photo via email or WhatsApp to the education leader or Children's Sabbath School teacher. (If there is none, send it to the team of the Education Department of the GC.)
